

Impact of Fuel Prices on Transportation Costs in India

By Mohammed Mikdad

Problem Statement & Objective

- Fuel prices in India have been increasing over time
- Transportation heavily depends on diesel fuel
- Increase in fuel prices affects cost of goods and services
- Objective: To analyze relationship between fuel prices, crude oil, and inflation

Data Overview

- Petrol and Diesel price data (monthly)
- Crude oil price data
- Inflation data (CPI)
- Time period: 2017 – 2025
- Data processed and converted into monthly format

Fuel Price & Crude Oil Trend

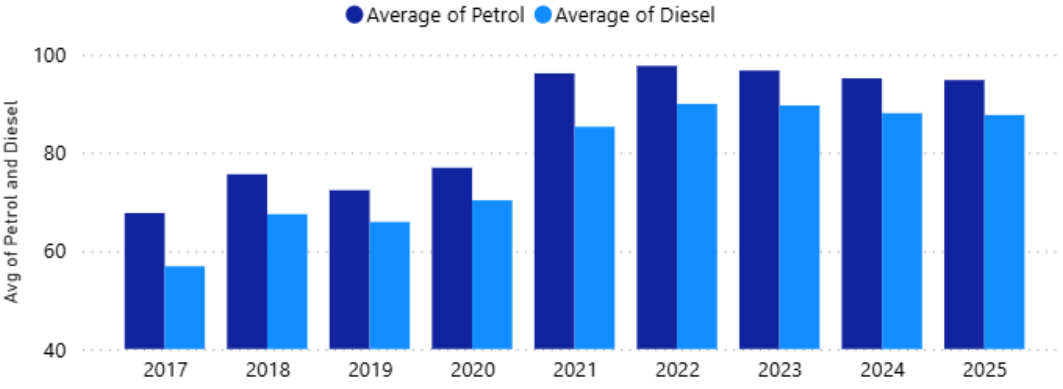

Diesel Price vs Inflation Relationship

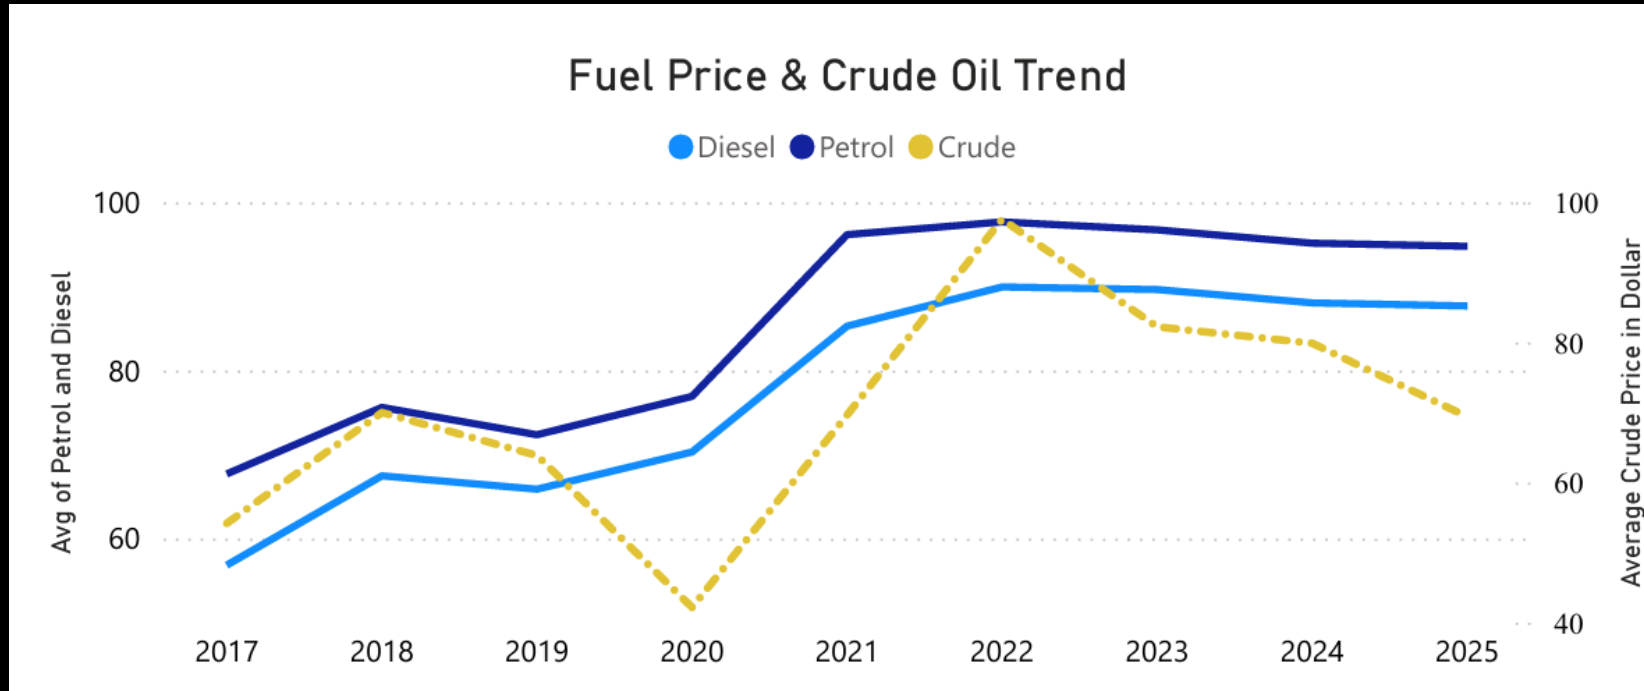

Inflation Trend Over Time

Yearly Fuel Price Comparison

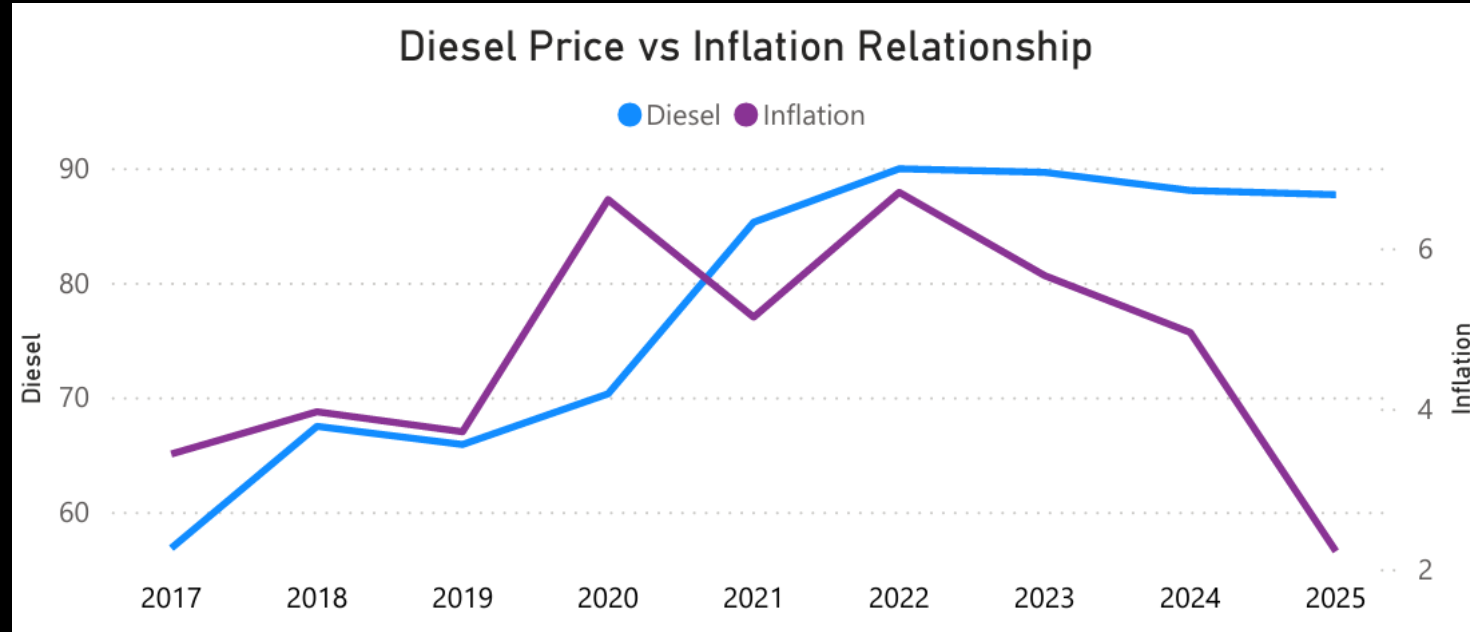

Fuel Prices Follow Crude Oil Trends

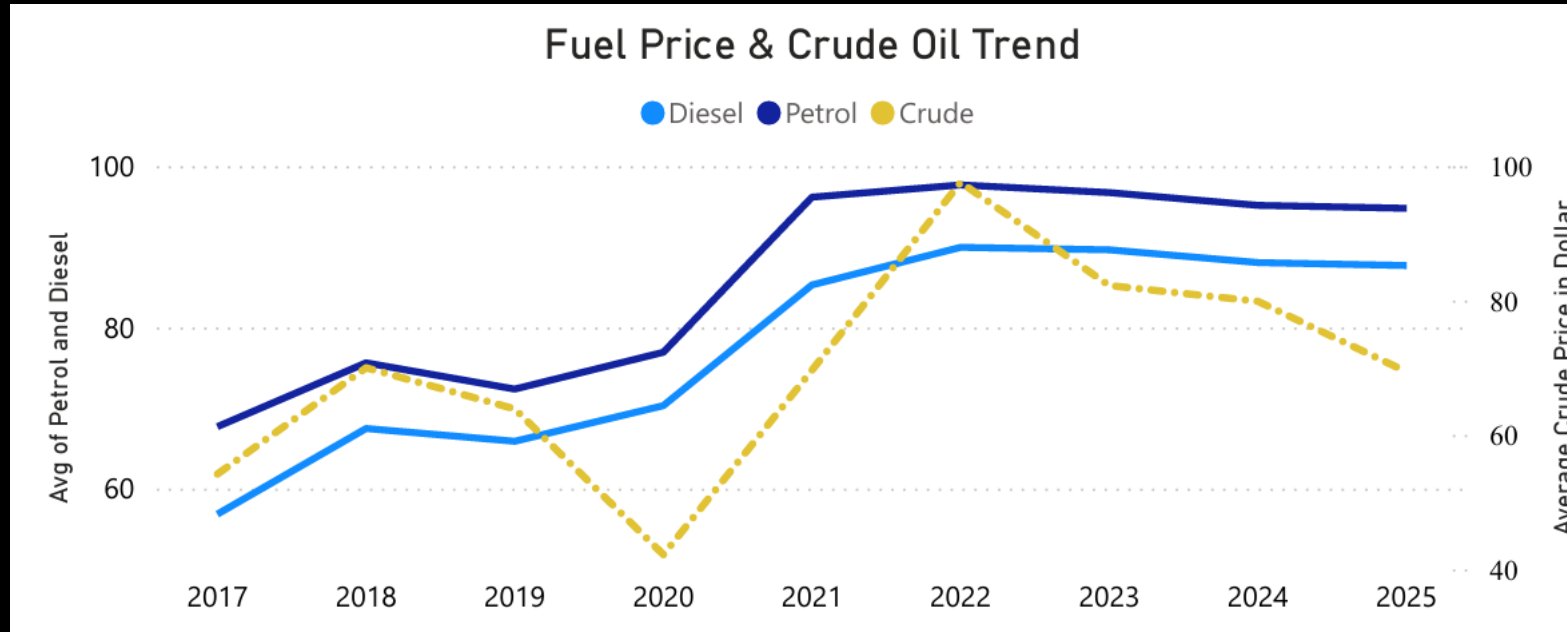

- Petrol and diesel prices move with crude oil
- Increase in crude leads to increase in fuel prices
- Indicates dependency on global oil markets

Diesel Prices Influence Inflation

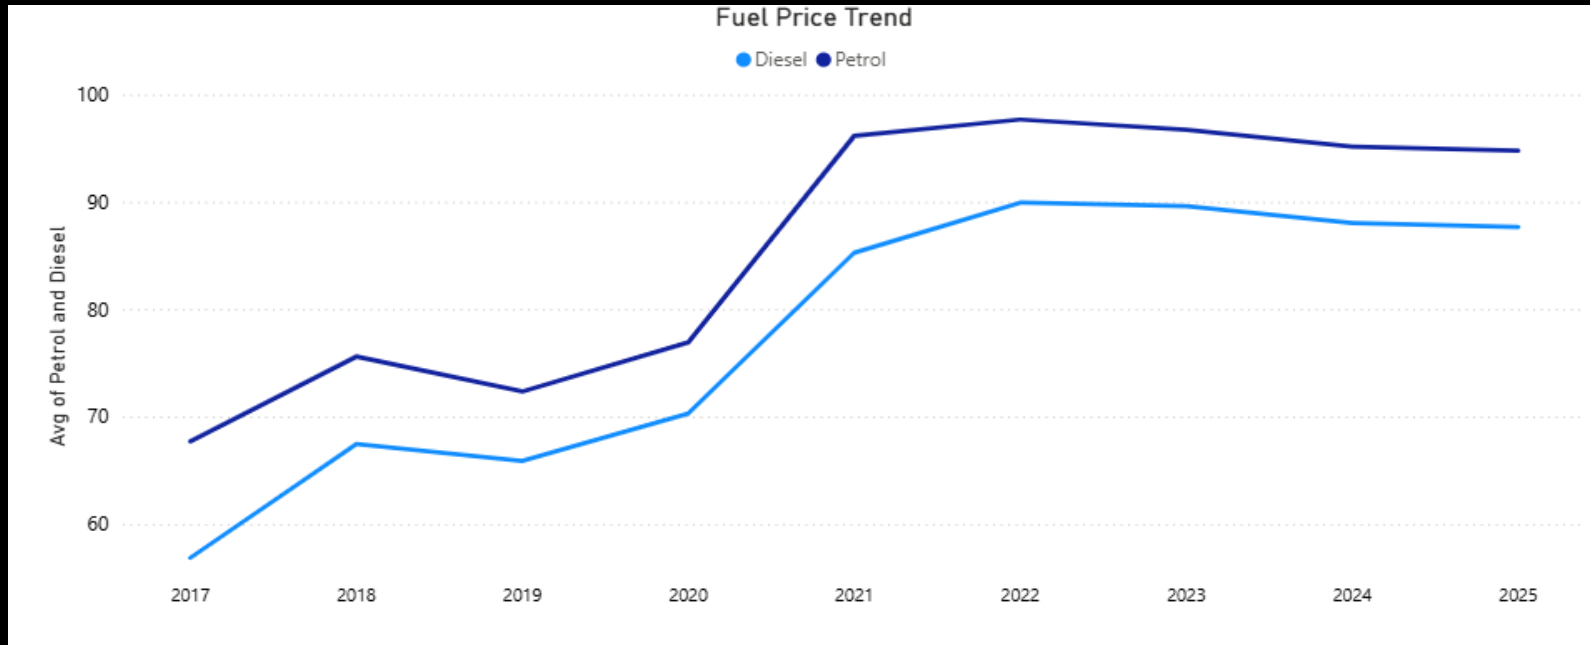

- Diesel is widely used in transportation
- Increase in diesel raises logistics costs
- Higher transport cost impacts inflation

Fuel Prices Did Not Fall Proportionately During COVID

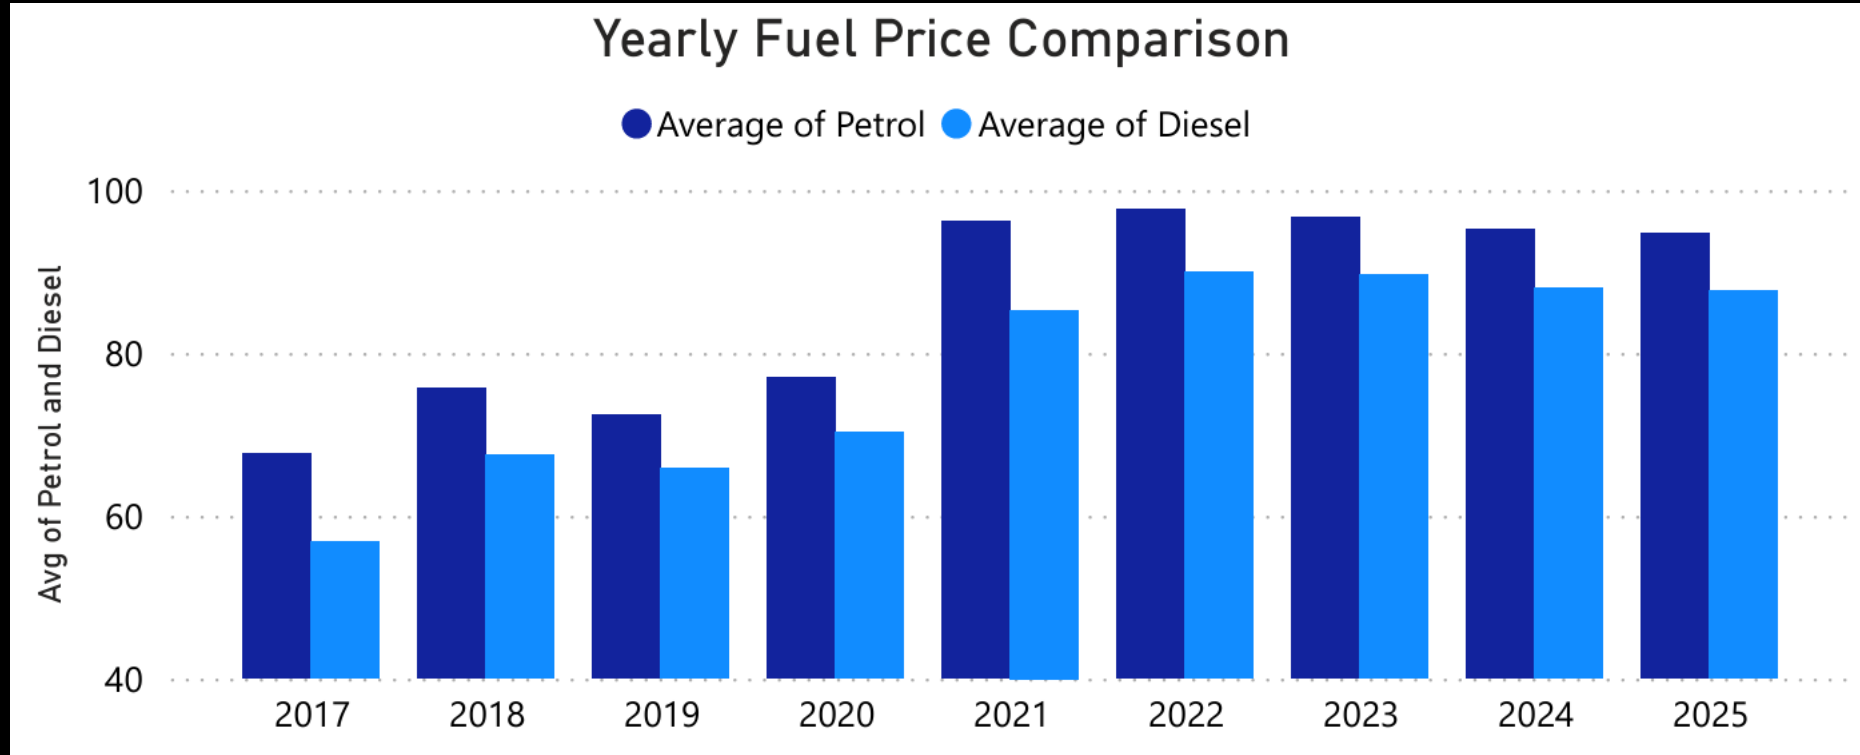

- Crude oil prices dropped sharply in 2020
- Fuel prices did not decrease equally
- Indicates impact of government policies and taxes

Fuel Prices Show an Overall Upward Trend

- Fuel prices have increased over time
- Fluctuations observed during different periods
- Significant rise after COVID period

Yearly Fuel Prices Show Continuous Increase

- Fuel prices increase year by year
- Diesel follows a similar trend as petrol
- Confirms long-term rise in fuel costs

Key Insights

- Fuel prices are influenced by crude oil prices
- Diesel has a strong impact on transportation and inflation
- Fuel prices did not decrease proportionately during COVID
- Government policies and taxes influence fuel pricing
- Fuel prices show an overall increasing trend

Conclusion

- Fuel prices significantly impact transportation costs
- Diesel plays a key role in logistics and supply chains
- Rising fuel prices contribute to higher inflation
- Fuel pricing is influenced by global and domestic factors
